

The Choice is Clear for Single Patient Ultrasound Scanning Gel

No colors, no fragrance, no gel waste, no refilling, no cross contamination...just individually packaged, proven ultrasound gel in one-ounce and half-ounce sizes for diagnostic and therapeutic procedures.

Clear Image Singles® Ultrasound Gel

• *Virtually Bubble Free.* To provide optimal sound velocity for accurate patient scans.

• *Control the Flow of Gel.* A built-in dispensing spout allows control as gel is dispensed.

• *Free of Dyes, Perfumes and Parabens.* Helps reduce the likelihood of skin irritation, staining and equipment degradation.

• *Convenient.* High and medium viscosity available. Choose from 30mL and 15mL sized packets. A sterile version is also available.

The Cardiff Pro Pediatric Laryngoscope Blade

Distributed by:

Finally! A Pediatric Standardization Option

Proact Cardiff Pro Blades are specially designed* (similar to Miller and Phillips blades) with a 5 degree downward angled blade (upward angled by 5 degrees when in use). It has a flat atraumatic tip that enables easier tongue control in pediatric patients.

Correctly formed blade shape and atraumatic tip where appropriate, no sharp edges.

Shielded optics provide properly focused output without distracting backlight.

Disposable, yet has a full-length spatula similar to a quality reusable blade.

Great for children's hospitals and pediatric departments. Available in three sizes – 00, 0 and 1

COMBIP[®] LARYNGOSCOPE
attached blade and handle set

CONVENTIONAL

*The Cardiff Pro originated as a result of a meeting among pediatric anesthesiologists in Great Britain who joined together in Cardiff, Wales to discuss the optimal pediatric blade. Rather than having to choose from the more than two dozen blade options in the market, the Cardiff Pro was manufactured by Proact to combine the best features from all the other options – thus allowing, standardization on ONE blade type.
